Preventative Care Medication List

\$0 Cost Share Medications and Products

U.S. Preventive Services Task Force A & B Recommendation Medications and Supplements

The health reform law (Affordable Care Act) makes certain preventive medications and supplements available to you at no cost—both prescription and over-the-counter (OTC). The following preventive medications are covered at 100% with \$0 copay when:

- Prescribed by a health care professional
- Age and/or condition appropriate
- Filled at a network pharmacy

The following is a list of the most commonly prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription drug benefit plan. The list is not all-inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

PLEASE NOTE: Not all the drugs listed are covered by all prescription-drug benefit programs; check your benefit materials for the specific drugs covered and the copayments for your prescription-drug benefit program. For specific questions about your coverage, please call the phone number printed on your member ID card.

Aspirin (Coverage Criteria: Women age 55-79; Men age 45-79; Pregnant women after 12 weeks of gestation who are at high risk for preeclampsia)

Preventative Care Medications Coverage

Frequently Asked Questions:

Under the health reform law, health plans must cover U.S. Preventive Services Task Force A & B Recommendation medications and FDA-approved prescription and over-the-counter (OTC) contraceptives for women at 100 percent without charging a copayment, coinsurance or deductible when:

Prescribed by a health care professional

Age and/or condition appropriate

Filled at a network pharmacy

To comply with these regulations which continue to be clarified further by the U.S. Dept. of Labor, Health & Human Services and the Treasury, we offer this list of \$0 cost-share Preventive Care Medications.

Which preventive care medications are available at \$0 cost-share?

Refer to the list in this document, sign in to the member website provided in your program materials, or call the number on the back of your health plan ID card for a list of medications covered at \$0 cost-share.

Please note, in order to obtain coverage at no cost for preventive care medications and products (including over-the-counter) you will need a prescription from your doctor.

What if my doctor says I need birth control that is not on this list?

This list covers all methods of FDA-approved birth control available through your pharmacy benefit. However, your doctor may decide you need birth control (contraception) that is not on this list for medical reasons. If so, you can request the type you need by calling the number on your health plan ID card, you will be required to pay a copay or coinsurance. Medical reasons may include side effects, whether the birth control is permanent or can be reversed, and whether you can use the product as required.

Your medical benefit may also cover other forms of birth control such as IUDs, implants and surgical sterilization.

What if my plan has a religious exemption for covering contraceptives?

Some plans may not have coverage for contraceptives if your plan is a religious employer under California law. However, you will still have coverage at \$0 cost-share of the U.S. Preventive Services Task Force A & B Recommendation medications listed on the Preventive Care Medications list, such as aspirin and vitamin D, tobacco cessation and breast cancer preventive medications.

If I need to take preparation medications before a preventive colonoscopy, how can I get these for no cost?

If you are scheduled for a preventive colonoscopy, ask your doctor for a prescription for one of the \$0 cost preparation medications. You can fill this prescription at a retail network pharmacy.

What if my doctor prescribes a preparation medication for my preventive colonoscopy that is not on this list?

You can ask your doctor for a prescription for one of the medications on this list that your doctor feels would work for you. For some medical reasons, your doctor may decide you need a medication that is not on this list to prepare for your preventive colonoscopy. If so, you can request the medication you need by calling the number on your health plan ID card, [you will be required to pay a copay or coinsurance](#). Medical reasons may include side effects, and whether you can use the product as required.

If you need a prescription medication to prepare for a colonoscopy that is not preventive, these medications may still be covered with a copayment or coinsurance.

If I'm at risk for cardiovascular disease, how can I get statin medications at no cost to me?

If you are a member age 40-75, and at risk for cardiovascular disease, your doctor may offer to prescribe statin medications. Select statins are covered at no cost-share for individuals who have certain risk factors for cardiovascular disease. Depending on the medication, your doctor may need to submit a prior authorization request to get medications approved for you at no cost if you meet coverage criteria. For members who don't meet this \$0 cost-share criteria or don't request prior authorization, those statins will continue to be covered at the customary cost share amount for your plan.

Statin prevention medications are typically covered at the customary cost-share amount for your plan. However, they are available at \$0 cost-share to prevent cardiovascular disease if a prior authorization is obtained. If you qualify based on criteria above, you can receive these drugs at \$0 cost-share.

Preventative Care Medications Coverage

Frequently Asked Questions (Continued):

How can I get preventive medications to help me stop using tobacco at no cost?

If you are age 18 or older and want to quit using tobacco products, talk to your doctor about medications that can help. If your doctor decides this therapy is right for you, they may prescribe an over-the-counter or prescription medication.

If I'm at risk for breast cancer, how can I get preventive medications for no cost?

If you are a member age 35 or older, talk to your doctor about your risk of getting breast cancer if you have not had it. If your doctor decides these drugs are appropriate for you, your doctor may offer to prescribe risk-reducing medications, such as raloxifene or tamoxifen. Your doctor can submit a prior authorization request to get these approved for you at \$0 cost-share if you meet coverage criteria.

These medications are typically covered at the customary cost-share amount for your plan. However, they are available at \$0 cost-share when used for breast cancer prevention if a prior authorization is obtained. If you qualify based on criteria above, you can receive these drugs at \$0 cost-share.

How can I get aspirin to prevent preeclampsia during pregnancy for no cost?

Low-dose or baby aspirin (81 mg) is available at no cost to pregnant women at risk for preeclampsia. If you are pregnant and at risk for preeclampsia, ask your doctor about whether low-dose aspirin can help. If so, your doctor can give you a prescription for low-dose aspirin to be filled at a retail network pharmacy at no cost to you.

Will this drug list change?

Drug lists can and do change, so it's always good to check. You can find updated information by:

- Signing in to the member website provided in you program materials
- Calling the number on your health plan ID card

What if I have a high-deductible or consumer-driven health (CDH) plan?

The same no-cost options on the list applicable to your plan will be available to you if you are in one of these plans. If you fill a prescription for covered products not on your plan's no-cost drug list, you will need to pay the full cost, until your pharmacy plan deductible is reached.

Are the no-cost Preventive Care Medications available at both retail and mail pharmacies?

Preventive Care Medications are available at both network retail pharmacies and the mail order pharmacy for plans with a mail order benefit.

What if the health care reform law requirements for preventive care medication coverage change?

If the law requiring plans to provide preventive care medications at no cost changes, information on how your costs may be impacted will be available to you by:

- Signing in to the member website provided in you program materials
- Calling the number on your health plan ID card

What if my doctor prescribes a similar preventive medication that is not on this list?

The health reform law allows plans to use reasonable medical management to decide which product/medications are provided at \$0 cost-share. If you choose a no-cost product from the list applicable to your plan, your cost at the pharmacy will be \$0. If you choose a covered product/medication that is not on the list, a copay or coinsurance may be required. And this cost will apply to your deductible if you have one.

You can ask your doctor for a prescription for one of the medications on this list that your doctor feels would work for you. For some medical reasons, your doctor may decide you need a medication that is not on this list. If so, you can request the medication you need by calling the number on your health plan ID card, you will be required to pay a copay or coinsurance . Medical reasons may include side effects, and whether you can use the medication/product as required.

Please note this list is subject to change.

Always refer to your benefit plan materials to determine your coverage for medications and cost-share. Some medications listed on the PDL may not be covered under your specific benefit. Where differences are noted, the benefit plan documents will govern.

*All **brand-name** medications are trademarks or registered trademarks of their respective owners.*

The age limits listed within this document are based on U.S. Preventive Services Task Force Recommendations; coverage for additional populations may also apply as required.

The pricing and inclusion of any prescription drug within this preferred drug list is subject to change and is not guaranteed. While we strive to maintain up to date pricing, drug manufacturers and pharmacies may alter pricing at any time creating the opportunity for an outdated price to be displayed on this preferred drug list before price changes can be updated on this preferred drug list.
